RENEN C. RIVERA

riverarenen02@gmail.com | https://github.com/nen02

PROFESSIONAL SUMMARY

Experienced full-stack developer with a proven track record of designing and delivering scalable software solutions, including HRIS, accounting, and workflow systems. Adept at leading cross-functional teams, automating complex processes, and creating user-centric applications. Proficient in React, Spring Boot, Python, and cloud-based technologies, with a strong commitment to code quality and performance optimization.

TECHNICAL SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript, Python, PHP, HTML, CSS
- **Frontend:** Angular, React, Vue.js, React Native, Tailwind CSS, Material UI
- **Backend:** Spring Boot, Node.js, Express.js, Laravel, Django
- **Databases:** PostgreSQL, MySQL, SQLite
- **Testing & Automation:** Playwright, Jest, JUnit, Jasmine, Groovy, End-to-End (E2E) Testing, Test Automation
- **DevOps & Tools:** Git, Docker, Kubernetes, CI/CD, Postman, Jira, Confluence, Figma
- **State Management:** Redux, Zustand, Vuex
- **Software Design:** Object-Oriented Programming (OOP), MVC, REST APIs
- **Data Formats:** JSON, XML, YAML
- **Methodologies:** Agile (Scrum, Kanban, Lean)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Oracle NetSuite | May 2025 – Present

- Led the development of Oracle NetSuite Japan Localization SuiteApps, including Japan Localization, Financial Statements, Bank Feeds, and Fixed Asset Reports.
- Leveraged AI tools (Claude and Codex) to accelerate feature development, validate implementations, and ensure production-ready quality.
- Owned feature planning, technical research, solution design, and testing strategy for new product enhancements.
- Improved application performance and architecture to enhance scalability, maintainability, and reliability.
- Developed and maintained automated test suites with a consistent 100% passing rate.
- Built **NSync**, an internal tool that synchronizes test data across 10+ NetSuite test accounts, streamlining development and QA workflows.
- Designed and developed a reusable **Playwright** automation framework that accelerated the migration from Groovy-based UI tests across multiple teams, achieving up to **10× faster** test execution.
- Performed code reviews, mentored engineers, and contributed to AI adoption and engineering process improvements.

Senior Software Developer

Radztech Business Solutions | Jun 2022 – March 2025

- Designed and delivered a **Human Resource Information System (HRIS)** for 10+ companies, serving 1000+ employees and automating manual processes by 90%.
- Implemented advanced features such as **payroll integration**, **biometric timekeeping**, and **real-time geotagging** for employee logging.
- Automated government-mandated deductions and accounting system integration, increasing data accuracy and efficiency.
- Mentored and managed a team of 2 junior developers, ensuring high-quality project delivery through code reviews and sprint planning.

- Analyzed business requirements and collaborated with clients to deliver solutions tailored to their operational goals.

Software Engineer (Part-Time)
Dory PH, Inc. | Sep 2024 – Oct 2024
- Refactored codebases, reducing bugs and improving maintainability.
- Optimized API usage, achieving an 80% reduction in operational costs.
- Provided architectural recommendations, enhancing scalability and performance.

Technical Assistant
Government Service Insurance System (GSIS) | Jan 2021 – May 2022
- Automated 10+ processes using SAP scripting, saving over 15 hours of administrative work weekly.
- Developed a real-time transaction monitoring system using Excel and VBA, improving data integrity and reducing errors.

Full-stack Developer
Technosite IT Business Solution | Sep 2019 – May 2020
- Spearheaded the development of a **Food Service Management System**, improving order accuracy by 20%.
- Designed and deployed a **HRIS**, delivering user-friendly solutions that enhanced operational efficiency.

EDUCATION

B.S. in Computer Science
Isabela State University, 2019
- **Awards**
    - First Place, General Programming Contest (2019)
    - Second Place, General Programming Contest (2018)
- Developed the university website using WordPress

CERTIFICATIONS

- **Computer Systems Servicing NC II** – TESDA, 2018
- **Civil Service Professional Eligibility** – PRC, 2021

PROJECTS

Human Resource Information System (HRIS)
- Automated **Payroll System** handling variable shifts, overtime, and deductions.
- Integrated **Timekeeping System** with biometric devices and geotagging for attendance tracking.
- Designed a **Self-Service Employee Portal** for leave and overtime applications with real-time location validation.
- Streamlined payroll-to-accounting integration, automating journal entries for improved accuracy.

Accounting and Inventory Systems
- Built an **Accounting System** with vouchering and journal entry management.
- Designed an **Inventory System** for automated stock tracking and detailed reporting.
- Developed a **Point-of-Sale System** for real-time transaction logging.

Mobile App: Nummz
- Personal finance application for tracking income and expenses across multiple accounts.
- Create and monitor budgets on a weekly, monthly, quarterly, and yearly basis.
- Track money lent to others and outstanding debts.
- Schedule recurring or planned payments with reminders before their due dates.

Desktop App: NTrack

- Desktop application that monitors user activity, including active applications and websites visited.
- Generates usage summaries and securely sends reports to a configurable server for analytics and payroll tracking.

Government Transaction Monitoring System

- Developed a real-time monitoring system to flag irregular transaction patterns.
- Automated 10+ processes using SAP scripting, saving 15+ hours per week.

Web Development and Mobile Game Projects

- Designed and launched a responsive university website using WordPress.
- Built a mobile game using Unity, showcasing creativity and technical expertise.

TECHNICAL INTERESTS

- **Cloud Computing:** Designing scalable and cost-efficient solutions using AWS services, including Lambda, EC2, S3, and RDS.
- **Distributed Systems:** Implementing real-time data streaming and event-driven architectures with Kafka.
- **Caching Mechanisms:** Leveraging Redis for efficient in-memory data storage and optimized application performance.
- **Advanced System Architecture:** Exploring microservices, serverless frameworks, and container orchestration tools like Kubernetes to build resilient and modular systems.
- **GraphQL APIs:** Designing flexible and efficient APIs to enhance data querying and reduce over-fetching in modern applications.
